IIT Techfest Internship, iStop Industrial Program on Artificial Intelligence from Personify and Completed 3 projects.	Nov 2021 - Feb 2022

PROJECTS	
Fashion MNIST Data Classification Project - Artificial Intelligence ◦ An artificial intelligence system that recognizes and categorizes human clothing is required to increase sales or better understand users. ◦ This will build a deep learning model using the TensorFlow framework to handle a problem. ◦ we will learn how to create a classification model with a dataset other than numeric-like images.	Dec 2022 - Jan 2023
HandWritten Digit Classification with CNN. - Artificial Intelligence ◦ Build a model which can identify the handwritten digits by classifying them. ◦ using the given dataset and libraries we are building the convolutional Neural Network and evaluating the model. Tensorflow, keras, clustering, deep learning, NLP ◦ Source code	Nov 2021 - Jan 2022
Recognition of Objects with Convolutional NEURAL Network - Artificial Intelligence ◦ The aim of this project is to build a deep learning model so as to recognize the objects by using CIFAR10 data set. ◦ using CNN, Keras, Tensorflow Source code	Nov 2021 - Jan 2022
